Software Engineering Projects

Find My Pet

- An App where you can search for shelters and their pets available for adoption, according to your location.
- This project was created using React.js and Ruby on Rails. Deployed to Heroku and Github pages. It was styled using CSS.
- Github: <https://bit.ly/3roY7Oy>
- Heroku: <https://bit.ly/36SbmPU>

What Workout

- This app was developed using Ruby on Rails.
- The user can create training plans, choose what type of workout they want to do and exercises for that workout.
- Deployed using Heroku
- <https://bit.ly/35VSfEo>

Professional Experience

Full-Time Stockroom Assistant

COUNTRY ROAD GROUP | NOV 2015 - PRESENT

- Assisted customers on the floor, over the phone and online.
- Worked across all areas of the business, from stockroom to Higher Duties when manager wasn't available or during holidays.
- Responsible for store stock control, receiving and adjusting stock on the system.
